

GRAB[®]-400

ground retractable automobile barrier

The Ground Retractable Automobile Barrier (GRAB-400) system is an active vehicle barrier that has met test criteria of ASTM 2656-07 M40/P2 (15,000 lb truck at 40 mph, penetration 3.31' to 23.0'). In numerous real-world impacts, the GRAB system has effectively stopped vehicles weighing 15,000 lbs traveling at speeds reaching 40 mph and above. The GRAB-400 offers a reliable solution for active vehicle barriers with very little maintenance required and very durable components (existing installations with well over 1 million cycles and going).

GRAB®-400

ground retractable automobile barrier

specifications

- + ASTM M40 Crash Certified
- + 12' to 60' Tested - Received P2 Rating
- + 12' Tested - Received P1 Rating
- + Ability to Be Reset and Be Back In Operation Within Minutes of Impact
- + **Cost Efficient**
Replaces Multiple Barriers With One GRAB System
- + Short Stopping Distance
- + 18" Shallow Mount Foundation
- + Flexible Design Suitable for Access
- + All-Electric Operation
- + **Reusable System**
Interchangeable Part for Quick and Easy Replacement
- + No Hazardous Materials
- + Traffic Control Devices Integrated into Barrier Design
- + Low Maintenance Requirements
- + All-Weather Operation
- + Custom Covers Available to Match Facility Design Standards
