**"LESS-THAN-LETHAL"
ACTIVE VEHICLE
BARRIER SYSTEMS**

GLOBAL GRAB IS KNOWN AS AN INNOVATOR AND INDUSTRY LEADER.

We are a Team of Hostile Vehicle Mitigation and Perimeter Security Experts. Our Team is proud to have earned several industry awards, multiple patents, and government recognitions, along with U.S. Department of Homeland Security SAFETY Act Certification for its Perimeter Security and Access Control Components.

OUR PRODUCTS & SOLUTIONS ARE DESIGNED TO

**Increase Officer
Safety**

**Safely Stop &
Contain "Port &
Checkpoint
Runner" Vehicles**

**Eliminate High
Speed Chases**

**Deter &
Eliminate
Vehicle Security
Breaches**

**Improve
Intelligence &
Investigative
Capabilities**

GRAB 350 LESS-THAN-LETHAL SYSTEM

The GRAB 350 "Less-than-Lethal" Active Vehicle Barrier System is designed, engineered, and manufactured based on the input of Customs, Border and Law Enforcement Professionals and real-world Land Border Port of Entry vehicle "Port Running" incidents.

The patent pending GRAB 350 system is designed to deter, safely stop, and effectively contain intentional and unintentional vehicle "Port Runners" within the perimeter of the Port of Entry or checkpoint, thereby eliminating the need for high-speed chases.

The GRAB 350 is a two-tier, less-than-lethal integrated active vehicle barrier system utilizing Global GRAB's award-winning "less-than-lethal" and U.S. Department of Homeland Security SAFETY Act Certified GRAB 300 (Ground Retractable Automobile Barrier), which meets and exceeds the "G-force" requirements of U.S. Customs and Border Protection. The GRAB 300 is also ASTM M50 P2 crash rated.

The system also includes the CATSCLAW In-Ground Tire Shredding system, approved warning signs and signals, the SW1200 Post & Cable/ ASTM M50 P2 crash rated, custom user controls, a choice of solar power configurations, and other key components.

Both Inbound and Outbound vehicle traffic lanes at Land Border Crossing Ports of Entry, and interior vehicle checkpoints can benefit from the GRAB 350 "less-than-lethal" active vehicle barrier system's capabilities. Utilizing the GRAB 350 with its two-second system deployment in conjunction with Outbound Enforcement Operations can help in the interdiction and seizure of guns, weapons, currency, and stolen vehicles.

WATCH IT IN ACTION

GRAB-35 

GRAB 350 Value Proposition as it relates to Risk Mitigation & Cost Savings:

- Improves Officer Safety
- Eliminates High-Speed Chases
- Reduces Inbound Wait Times
- Reduction in Personnel assigned to Vehicle Port Running
- Reduces Potential Litigation
- Equitable Sharing opportunity for Local and State Government as it relates to the Seizure of Illegal Currency, Vehicle, and other Assets

GRAB 350 Intelligence, Investigative & Operational Advantages:

- Increases the Probability of Obtaining Key Intelligence & Investigative Information from Driver and Occupants in a Timely Manner
- Effectively and Safely Contains the Vehicle & Occupants for further Investigation and Screening
- Optional Solar Power as Primary or Battery-Backup
- Effective in Combination with Non-Intrusive Inspection (X-Ray) to Contain and Stop a Vehicle with Illegal Contraband from "Port Running"

OUR 4 STEP PROVEN PROCESS

1 BEST PRACTICES CONSULT

We utilize a best practices and proven approach to perimeter security that allows us to formulate recommendations and to discover potential security gaps as we work diligently to identify solutions that others might miss, and to solve operational challenges that seem unsolvable.

2 DESIGNER & ENGINEER

Our innovative team has a track record of designing new products, solutions and technology to fulfill the functional obligations and requirements of a customer's specific perimeter security goals if an existing product or solution is not available in the market.

3 CONSTRUCT, FABRICATE, & INTEGRATE

Our key differentiator is our experience in engineering, fabrication, manufacturing and construction and our success in designing custom controls while leveraging integration efficiencies and best practices.

4 MAINTAIN & SERVICE

We are proud of our success in delivering a well-defined maintenance, service and warranty program designed to meet the challenges and service-level agreement requirements of mission critical organizations on a 24-hour/7-day-a-week basis, while protecting a customer's investment.
