STAR Barriers

About

Global GRAB's STAR Barriers provide security professionals with a versatile, rapidly deployable vehicle barrier system for both temporary and permanent applications. Ideal for checkpoints, access control points, crime scenes, special events, and traffic inspection zones, the STAR Barriers have gained widespread acceptance and use by defense, military, law enforcement, and corporate security teams worldwide.

STAR Barrier sets are available in two configurations: 2 feet, for passenger vehicle applications, and 3 feet, for mixed-use cases involving both passenger and commercial vehicles. Each set includes three stars linked by cabling, with the ability to connect multiple sets seamlessly. The lightweight, compact design folds into a uniform assembly for easy storage in its dedicated case. Deployment is quick and straightforward, with just four simple steps required to set up.

Deployment of Multiple STAR Barrier Sets

STAR Barriers Specs
