CUSTOM CONTROLS

About

Global GRAB's custom control systems for hostile vehicle mitigation, perimeter security, and access control projects are designed, assembled, and tested by a highly experienced engineering Team at Global GRAB's headquarters in Franklin, Tennessee, to meet a specific Concept of Operations (CONOPS), user-sequencing, and requirements.

Each custom control system project is executed with the highest level of attention to detail and quality assurance to ensure it provides the required level of integration and ease-of-use required to meet and exceed expectations.

Global GRAB's custom controls and panel shop is also known as an industry leader who designs and assembles best-in-class and feature-rich custom controls that are compatible and tightly integrated with 3rd party hostile vehicle mitigation, perimeter security, and access control products and solutions, besides its own.

Precision-Engineered Custom Control Solutions

Customers who visit our custom controls and panel shop leave with a great deal of enthusiasm about Global GRAB's capabilities and value in designing and implementing custom controls and barrier panels for their mission critical organization.
